

# Service Bulletin

File in Section: -

Bulletin No.: PIT5273

Date: April, 2014

## PRELIMINARY INFORMATION

**Subject:** 5th Wheel Or Camper Wiring Harness Location

**Models:** 2015 Chevrolet Silverado  
2015 GMC Sierra  
With 5th Wheel / Camper Harness (RPO UY2)

Some owners may question where the blunt cut wires are located for the gooseneck / 5th wheel / camper wiring harness (vehicles equipped with RPO UY2).

On past models, this harness was located along the left frame rail near the front of the pickup box.

For the 2015 model year, the location has changed to the rear of the pickup box – forward of the rear bumper and attached to the rear frame cross member, as shown below. NOTE: Picture below was taken with the pickup box removed.
